Abdul Rehman Asif

FOUNDER, AIBLITZO.COM & BOLDCLOSE | CONTENT WRITER & ENTREPRENEUR | BUILDING AI AUTOMATION & SAAS | GROWING BUSINESSES THROUGH CONTENT, AI & DIGITAL MARKETING SINCE 2023

PROFILE

I'm Abdul Rehman, a content writer from Okara, Pakistan. Writing has never been just a skill for me. It is how I think, how I build, and how I help businesses get found. I started with my first website, firshorb.com, in 2021, writing around 100 blogs and learning content writing, SEO, and publishing by doing it myself.

That start led to freelance work for clients, then to Justblogo, where I also managed social media and created new SEO strategies, and then to DemandTab, where I now write content for digital marketing and technology brands. I am an entrepreneur as much as a writer: in 2026, I founded AiBlitzo.com, my own website on AI tools and technology, where I test new AI tools hands-on and write about what actually works. I am also building BoldClose, a global AI automation agency, and developing SaaS products of my own.

Most content does not fail because of a lack of effort. It fails because it does not help the person reading it, or because no one can find it. My work focuses on both: content that is genuinely useful, and structured so search engines can find it - clear content, real value, and growth that lasts.

EXPERIENCE

Content Writer - DemandTab

2026 - Present

DUBAI-BASED COMPANY

- Write and edit SEO-focused content for digital marketing and technology-related topics.
- Research topics, keywords, search intent, and industry information before developing content.
- Create clear, useful blog and website content based on project requirements.
- Apply on-page SEO principles to improve content structure, readability, and search visibility.
- Work with the team to shape content around client requirements and marketing objectives.
- Use AI tools during research, development, and editing, reviewing all final output manually.

Founder & Content Strategist - AiBlitzo.com

2026 - Present

SELF-EMPLOYED - REMOTE - WWW.AIBLITZO.COM

- Built and developed AiBlitzo.com as an independent project covering AI tools, AI technology, and emerging digital trends.
- Research and create content around AI tools and technology, and manage website content, SEO, research, and digital publishing.
- Experiment with AI tools and new AI technologies through practical, hands-on projects, exploring AI-powered content creation and creative workflows.

Founder - BoldClose

2026 - Present

SELF-EMPLOYED - REMOTE

- Founder of BoldClose, a global AI automation agency for businesses worldwide.
- Building AI systems that help businesses respond to, qualify, and follow up with leads - including a 60-second WhatsApp lead-response system.

TOOLS

WordPress / Canva / ChatGPT / Google Gemini / Google Veo / Google Search Console / Google Analytics / Yoast SEO / Mailchimp / Adobe Creative Suite

HOW I WORK

Research first, write for the reader, and structure every piece so search engines can find it. I use AI tools every day for research and drafting, and I check every word myself before it goes out - AI makes the work faster, it does not make it good. That is still my job.
